Exercise 1.5.1

13 students have taken an exam. Their scores are: 10, 15, 10, 9, 18, 16, 14, 12, 16, 13, 15, 20, and 17.

You are a teacher and need to help recording these grades.

- Create a list of these scores and assign it to a variable named `marks`.
- Arrange the elements of `marks` in descending order.

Solution

```
# create a list of scores and name it 'mark
marks =[10, 15, 10, 9, 18, 16, 14, 12, 16,
# Arrange the elements of 'marks' in desenc
marks.sort(reverse=True)

# the resulting list
print(marks)
```
